PHOTO STORIES

We are happy to supply an electronic photo story of your order. This will detail the “story” behind the order. It will document the whole process of making the order.

It will detail in pictures and words what waste was used, the production process and the end product made. Also provide facts such as how many jobs were created or machines bought from the order.

Below is an example of conference bags made for the 2013 Microsoft TechEd conference held in Durban at the ICC.

The billboards below that would normally go to a landfill site and take 500+ years to biodegrade were used to create a unique conference bag for Microsoft

The production process of making these bags

Final products made from a Microsoft billboard and a 'LIRA's billboard

This order for 2300 conference bags resulted in an additional 5 full time jobs created over the 2 month period and an additional 4 people who assisted with cleaning, quality and packing the bags. From the profits of the order the owner invested in a much needed machinery.
